"I partnered with AbbyBank because I wanted my banking to be simple. I wanted a place where I could walk in to and feel like family. There's so many times that I got hit with fees and had to call the banker to reverse a fee. I always had to look at my account. With AbbyBank, I walk in and feel like I'm always taken care of and always thought of. I'm not just a number there. That's what you want when you're talking about your finances. I also wanted to know that there's another set of eyes on things in case something looks off. While running a business, there's always areas where errors can occur. Having a family banking environment helps me feel like the financial part is taken care of and I can focus more on the growth of the business."
